Arriving Saturday in his priate plane at Municipal Airport in Gulfport, Sam Rayburn, speaker of the House, was whisked by car to Bay St. Louis where he was the guest for the week end of Walter Gex Jr.

A fishing party had been arranged by Gex to entertain his distinguished visitor. The party boarded the 85-foot yacht Nemo II, owned by R. A. Billups of Greenwood for an overnight fishing trip in Gulf waters.

A second boat, belonging to Gex, was also used for actual fishing by the group.

Others in the party included Wm. Colmer, congressmen from this district; Ed Colmor, a brother of the congressmen; R. A. Billups; Peto Luttrell and Ed Armstrong, pilot and co-pilot of the private plane of Speaker Rayburn; Herman Doutsch of Now Orleans; Dr. H. A. Eldredge; Tom Mallini, who handled Gex's boat for the party.

The party sailed to Nine Mile Bayou Saturday night and returned to Bay St. Louis Sunday night.

COUNTY **AGENT'S** NOTES

Handock County Agent

Soil Conservation Grass waterways can help save our soil from washing away. During heavy rains, more water falls on nearly, all crop land than can be held by the best crop rotations, contour farming or even

This water will run off through some kind of waterway. Unless you provide a safe waterway, it will probably cut a gully. Any-grass waterway that

the best terraces.

used to carry extra water safely must be designed to take care of all rains. The grass cover should be dense. It must be kept in good condition from year to year.

When carefully made and planned and managed, grass waterways will pay their way with increased farm income. Many are used as hay fields, some produce grass or legume seed, and all can be used for grazing at some time during the year, depending on the kind of grasses or legumes used. For details on building such a grass waterway on your farm, see your county agent.

Catton Defoliation Due to late maturing cotton, it may be wise this year to use a chemical defoliant to hasten opening of the cotton boles.

Defoliation helps prevent losses from boll rot, provides longer picking days due to more dewfree hours, increases machine picking efficiency, and hand pickers are more attracted to fields that are free from leaves.

Dust defoliants appear to be the most effective in Mississippi. Calcium cyanamide, applied at 25 to 35 pounds per acre, should

give satisfactory results. Remember, bolls should be sufficiently mature so that yields SJA HOMECOMING dignitaries have been invited to will not be cut from defoliation. TO BE OCTOBER 16 be special guests of Mississippi Generally 50 per cent of the bolls should be open before defoliating.

> Fire Prevention Week Remember National Fire Pre-

vention Week is October 9-15. It is a good time for you to do something about the fire hazards on your farm and in your home. colorful event and see the State Make a check to see just how many fire hazards you can find and eliminate during this week. Watch out particularly for electrical faults, which last year actin have been extended special counted for more than 21 per

cent of all farm fires. THE BOOKWORM Television for fellows like mo Has little chance of succeeding: like to turn the radio on

A total of 122 new and ex-panded manufacturing plants employing 14,715 persons have been developed in Mississippi rectly to the development and diversification of agriculture in They include plants for ment shar packing pot try processing too dairy products and other food in 1

during the past two years, the Mississippi Agricultural and is-

dustrial Board reports in its bi-emital message to the mooming session of the legislature. The Board's two-year report also shows that the state's tourist business has climbed at the rate of botter than \$10,000,000, a year, or from \$253,082,884 in 1952 to \$285,776,041 in 1954.

The section of the roport covering industrial development shows that 74 new plants were established during the two years, while 49 existing plants underwent expansions. A total of 33 of the new plants and expansions were financed under provisions of the balance agriculture with industry act, while the balance were built with private capital. The Board estimates that the state's manufacturing payrolls were increased by \$36.790,000.

Diversified Industry The new additions listed by the Board in its report represent. a wide variety of manufacturers including apparel, textile, woodworking and furniture, metal fabricating, appliance, leather, chemicals, petroleum refining and a number of food products. Mississippians' interest in securing new industries is reflected in vote tabulations for the 2 industries financed under the BAWI act. People in communities which followed the BAWI route voted by a margin of 22 to 1. approving a total of \$8,498,-000 in bonds to acquire sites and construct buildings for lease to responsible manufacturers.

Charts accompanying the report show that per capita inc o m e, manufacturing payrolls and colos tox collections all have risen during the period, while each firm income dropped con-silerably. Drouth for three consecutive years was considered the reason for this docline. Food Processing

Industrial contact mea of the Board, backed by a national program of industrial advertising Board, backed by a national pro-gram of industrial advertising in an effort to reach and direct mail, have made per-sonal visits to the home offices. In an effort to reach all millions of fourist of 778 manufacturing companies the state's first motion during the period covered in the report. During the period from Tuly 1 .954 to Sentamber 4:

July 1, 1954, to September 1; 1966, the board sent 15,642 letters to manufacturers invit-ing them to consider Mississippi as a location for branch plants. Replies were received .rom 1924 companies, of which 503 firms indicated they would like to talk with an A. & I. Board represen-

tative. . Six important research studies were made during the period in a campaign designed to attract specific types of industry for which the state is well suited. These studies showed that Mississippi is especially well adapted for the apparel industry, the chemical industry, metal fabrication, and pulp processing. Surveys also were made of Mississippi salt deposits and the physical resources for the chemical industry.
The Board's industrial adver-

tising program during the per-iod, designed to keep the state's favorable story before business leaders and industrialists, was carried in a list of nationally recognized business magazines, newspapers and trad: publica-tions. One entire special magazine section of the New York Times was dayoted to telling the story of the state's industrial opportunities and its BAWI plan.

The Forestry Exhibit at the 1955 Mississippi State Fair to be held in Jackson Oct. 10-16 will be housed in a massive tent immediately adjacent to the A & Lassassin's bullet, two died Building, according to J. M. Dean, pneumonia, one of typhus and one 19, 1881, more than two mostle Executive Secretary. Entertaining of a massive cerebral hemorrhage, after he was shot by Charles 1 Executive Secretary: Entertaining and educational displays are to Elected Saturday at the Club to be featured. The central theme this coming year were of the exhibit is "Mississippi Trees Barry Bontemps, President, Kay need Industries; Mississippi In Cabell, Vice President and Evelyn dustries need Trees," and the dominant display will be an outline map of Mississippi, approximate ly 15 feet wide and 30 feet long. Arising from the center of this map and extending as high and wide as is practical will be an actual tree, stripped of foliage, with branches pruned back to stubs of varying lengths and

painted so as to camouflage its specie, since this tree will sympolize all those in Mississippi. A wide variety of wood products will be attached to the tree ber again this year of they dupli to emphasize the dependence of individuals and industries upon the trees of Mississippi.

To further illustrate the value of the forest industries to the and his Staff on their first edi-state, several picture boxes with Ektrachrome vivid color transparencies showing actual Mississippi forest industries and their Home from college to give the products will be on display.

Pulp, lumber, veneer and naval stores industries will be the main subjects represented. For attention getting purposes, each of the picture boxes will be equipped with an automatic off-and-on flash-

As a further drawing card, which will emphasize ear-appeal, there is to be a tape recording of the varied sounds of the woodusing industries. The whine of the saw, the groan of the chipper, having a tea at the home of one the grumble of the veneer lathe, the machine gun bark of the chain saw are to be recorded and the sounds will be interspersed with the slogan: "No business in Mississippi can long exist without forest products.

Commercial displays under the big tent this year will be Corinth Machinery Works, Mississippi Pine Manufacturers Association, International Paper Com-Masonite Corporation and

In front of the forestry tent will be a full-sized outdoor billboard poster carrying the fall forestry message, "Keep Mississippi Green" sponsored annually by the Mississippi Forestry Association.

"BUY IN MISSISSIPPI."

dictate sounder business policies, and it is now considered a foolish pastime. In effect, however, you may be an innocent victim, or a holdover of Diamond Jim's day, if you make a practice of spending your money outside of Mississippi. For every dollar that you spend outside your hometown or outside the state is lost forever. It deprives you of the benefits of increased business; it robs the state of needed taxes, the burden of which you now share. Don't

Remember that no matter what the weather is, the birds always need plenty of fresh drinking water and plenty of high quality

It is likely to give your birds a cold. Birds with colds lay fewer eggs and do not grow as fast as do healthy chickens.

HATTIESBURG MAN GETS LIFE SAVING MEDAL

Jack H. Cameron, Mississippi as is vested in me as said Trus-Power Company linesman at Hattiesburg, has been presented the Edison Electric Institute Medal for saving the life of a fellow employee through the use of artificial respiration.

When a fellow employee contacted a live wire while working on a pole, Cameron, also working the provisions of and by virtue of on the pole, pulled him away the authority conferred upon me from the wire. Cameron immediately swung around the pole, vin Spiers and Mrs. Marvin Spiers, placed the injured employee on to the Merchants Bank & Trust his safety belt, and began applying the pole-top method of artificial respiration.

In a very short time the injured man began to breathe but and which said deed of trust is then passed out again. Cameron recorded in Vol. 56, page 404, continued working with him and Records of Mortgages and Deeds after two or three minutes breath of Trust on Land in Hancock ing was restored again.

Get a new street quickly and aconomically with durable, low-cost SOIL - CEMENT

A clean attractive, smooth riding street in front of your house, increases the value of your property. A dusty, bumpy potholed street is unsightly and masafe. It is a missance to drivers who use it and to property owners who live on it. The constant patching, and repairing of such a street is a waste of time, temper and taxes.

It your affect is worn-out and run down, it can be converted into an all weather payement quickly and economically. Just ask your city officials to pave it with soil cement. Soil-cement is a combination of soil or granular material usually on the street and portland cement and water Mixed and compacted, these elements form a rigid, durable base. A bituminous surface completes the pavement.

Soll cement is economical. Low in first cost, it delivers years of dependable service with a minimum of maintenance.

Soil-cement paving is fast. An experienced crew can pave your entire street in a single day-with practically no inconvenience to you.

Act now to pave your rough, worn-out street. Insist on soil-cement.

It's today's best low-cost-pavement, value for residential streets.

Edward Fee, deceased

are you playing a

In Diamond Jim's era it was quite the thing to cigars with ten dollar bills and scatter money around indiscriminately. Heavy taxes today dictate sounder business policies, and it is now considered a foolish pastime. In effect, however, you may be an innocent victim, or a holdover of Diamond Jim's day, if you make a practice of spending your money outside of Mississippi. For every dollar that you spend outside your hometown or outside the state is lost forever. It deprives you of the benefits of increased business; it robs the state of needed taxes, the burden of which you now share. Don't play a losing game. Be smart.
